Prioritized Relevant Effect Identification for Problem Solving Based on Similarity Measures

D. Daniel Sheu , Jealousy Hong

PII: S0957-4174(18)30038-1
DOI: [10.1016/j.eswa.2018.01.032](https://doi.org/10.1016/j.eswa.2018.01.032)
Reference: ESWA 11780

To appear in: *Expert Systems With Applications*

Received date: 26 June 2017
Revised date: 5 January 2018
Accepted date: 20 January 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Enhancing existing parameters and functions to cover problem solving situations.
- Enabling mathematical computations for providing prioritized effect solutions.
- Providing a method to continually accumulate expert knowledge and experience.
- Providing expert-solved cases as a rapid, objective, and effective solving system.
