This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

#### ACCEPTED MANUSCRIPT

## Highlights

- An implementation approach for double-loop learning in projects is proposed.
- A combined application of two complementary methods is suggested: LSA and ANP.
- The approach contributes to the semi-automated discovery of project knowledge.
- The approach also contributes to the implementation of knowledge in new projects.
