This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- New heuristics to generate synchronizing words have been proposed in the literature.
- Greedy and Cycle synchronizing heuristics have been frequently used as a benchmark.
- We make these heuristics order(s) of magnitude faster.
- The proposed techniques will yield better performance evaluations for future studies.
