This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The work proposes a new pattern discovery approach.
- The approach combines rules between PIPs and the SAX representation.
- The rules and characters allowed the distinction of the different types of trends.
- The GA allowed a huge flexibility of solutions and to identify different patterns.
- All the results of this approach have outperformed the Buy&Hold strategy.
