An efficient hybrid algorithm for the Traveling Car Renter Problem

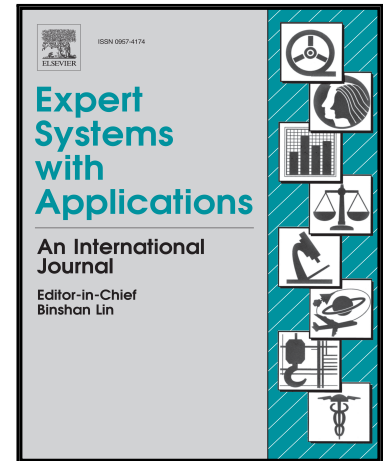

André Renato Villela da Silva, Luiz Satoru Ochi

PII: S0957-4174(16)30385-2
DOI: [10.1016/j.eswa.2016.07.038](https://doi.org/10.1016/j.eswa.2016.07.038)
Reference: ESWA 10784

To appear in: *Expert Systems With Applications*

Received date: 23 December 2015
Revised date: 25 July 2016
Accepted date: 26 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An Evolutionary Algorithm is proposed for non-Euclidean instances.
- An hybrid method using variable fixing is used as local search.
- Good calibration of algorithmic parameters can produce better solutions against literature results.
