Multi-objective non-linear programming problem in intuitionistic fuzzy environment: Optimistic and pessimistic view point

Deepika Rani, T.R. Gulati, Harish Garg

PII: S0957-4174(16)30381-5
DOI: [10.1016/j.eswa.2016.07.034](https://doi.org/10.1016/j.eswa.2016.07.034)
Reference: ESWA 10780

To appear in: *Expert Systems With Applications*

Received date: 26 January 2016
Revised date: 31 May 2016
Accepted date: 22 July 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Multi-objective optimization problem under intuitionistic fuzzy environment has been considered.
- Degree of attainability and non-attainability is represented by non-linear functions.
- Optimistic and pessimistic aspect of the problem has been considered.
- The validity of the problem has been discussed.
- multiobjective problems arising in the transportation and manufacturing systems have been taken for demonstration.
