This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We use Cuckoo Optimization Algorithm for hiding sensitive association rules.
- A preprocess is defined that causes speedy access to the optimal solution.
- Introducing three fitness functions with minimum side effects.
- An immigration algorithm is defined to escape from local optimums.
- For efficiency assessment, the algorithm is examined on real and synthetic data.
