Depth-based Human Activity Recognition: a comparative perspective study on feature extraction

Heba Hamdy Ali, Hossam M. Moftah, Aliaa A.A. Youssif

PII: S2314-7288(17)30051-X

DOI: [10.1016/j.fcij.2017.11.002](https://doi.org/10.1016/j.fcij.2017.11.002)

Reference: FCIJ 29

To appear in: *Future Computing and Informatics Journal*

Received Date: 5 September 2017

Revised Date: 18 November 2017

Accepted Date: 26 November 2017

Please cite this article as: Ali HH, Moftah HM, Youssif AAA, Depth-based Human Activity Recognition: a comparative perspective study on feature extraction, *Future Computing and Informatics Journal* (2018), doi: 10.1016/j.fcij.2017.11.002.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Depth-based Human Activity Recognition: a comparative perspective study on feature extraction
