This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Existing AF detection techniques are discussed
- Building blocks of CADx system are described
- Different features explored by researchers are presented
- State-of-art CADx system for AF are highlighted
