Scalable Prediction-based Online Anomaly Detection for Smart Meter Data

Xiufeng Liu, Per Sieverts Nielsen

PII: S0306-4379(17)30321-6
DOI: [10.1016/j.is.2018.05.007](https://doi.org/10.1016/j.is.2018.05.007)
Reference: IS 1315

To appear in: *Information Systems*

Received date: 18 May 2017
Revised date: 14 May 2018
Accepted date: 28 May 2018

Please cite this article as: Xiufeng Liu, Per Sieverts Nielsen, Scalable Prediction-based Online Anomaly Detection for Smart Meter Data, *Information Systems* (2018), doi: [10.1016/j.is.2018.05.007](https://doi.org/10.1016/j.is.2018.05.007)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A prediction-based anomaly detection method
- Anomaly detection system based on real-time big data architecture
- Iterative detection model update and real-time anomaly detection
- Supporting real-time anomaly detection for scalable smart meter data
