This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We conduct an exhaustive and up-to-date survey of web search engines
- We evaluate the hit counts provided by web search engines from a research perspective
- We assess the accuracy, mathematical coherence and temporal consistency of hit counts
- We identify the web search engines whose hit counts are best suited for research
