This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

How Social Distance Might Shape Human-Robot Collaboration

Yunkyung Kim

Korea Advanced Institute of Science and Technology

Bilge Mutlu

University of Wisconsin–Madison

Author Note

We would like to thank Dr. Leila Takayama for her valuable comments, Faisal Khan for his help in programming the robot, and Mitsubishi Heavy Industries, Ltd. for their loan of the Wakamaru robot.
