RDR-based Knowledge Based System to the Failure Detection in Industrial Cyber Physical Systems

Dohyeong Kim, Yingru Lin, Soyeon Caren Han, Byeong Ho Kang, Sungyoung Lee

PII: S0950-7051(18)30060-1
DOI: [10.1016/j.knosys.2018.02.009](https://doi.org/10.1016/j.knosys.2018.02.009)
Reference: KNOSYS 4217

To appear in: *Knowledge-Based Systems*

Received date: 2 October 2017
Revised date: 18 December 2017
Accepted date: 4 February 2018

Please cite this article as: Dohyeong Kim, Yingru Lin, Soyeon Caren Han, Byeong Ho Kang, Sungyoung Lee, RDR-based Knowledge Based System to the Failure Detection in Industrial Cyber Physical Systems, *Knowledge-Based Systems* (2018), doi: [10.1016/j.knosys.2018.02.009](https://doi.org/10.1016/j.knosys.2018.02.009)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Industrial data analysis and feature selection by using crowdsourcing approach
- Hybrid (machine learning and human) industrial failure detection approach proposal
- Outstanding performance in enhancing the accuracy of failure detection
- Reduction of human expertise acquisition time and overfitting solving cost
