This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Introduction of dynamic classifier selection for one-class classification
- Three novel competence measures for one-class classifiers
- Gaussian approach for extending competence over the entire decision space
- Results indicating that dynamic selection is a good alternative to static ensembles
