This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlight

- We propose a new approach for training ANFIS structure
- The parameters of ANFIS are optimized by simulated annealing algorithm.
- The proposed method is applied to the dynamic system identification problems.
- The obtained results show that the proposed approach can be successfully used for training ANFIS.
