This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- We follow a cascaded normalization strategy for acoustic feature adaptation.
- We employ Kernel Extreme Learning Machines for efficient and robust learning.
- The proposed framework is validated via the challenging cross-corpus setting.
- Results indicate the efficiency and effectivess of the proposed framework.
