This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- A visual cloud-based platform to design and evaluate CI solutions is proposed;
- Athena uses a new paradigm called CIaaS for ease the development of CI systems;
- Athena has 35 built-in modules that can be connected to create hybrid systems;
- The work present and validate through an experiment a more mature version of Athena;
- Empirical study showed that Athena reduces effort to implements CI-based solutions.
