

## Accepted Manuscript

A performance modeling framework for lambda architecture based applications

M. Gribaudo, M. Iacono, M. Kiran

PII: S0167-739X(17)31536-4

DOI: <http://dx.doi.org/10.1016/j.future.2017.07.033>

Reference: FUTURE 3563

To appear in: *Future Generation Computer Systems*

Received date: 11 January 2017

Revised date: 8 June 2017

Accepted date: 13 July 2017

Please cite this article as: M. Gribaudo, M. Iacono, M. Kiran, A performance modeling framework for lambda architecture based applications, *Future Generation Computer Systems* (2017), <http://dx.doi.org/10.1016/j.future.2017.07.033>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- This paper presents a performance evaluation of Lambda architecture based computing systems
- The system is modeled by means of a multisolution approach
- Our work aims at providing insights to designers
