

## Accepted Manuscript

Network measurement for 100 GbE network links using multicore processors

Xiaoban Wu, Peilong Li, Yongyi Ran, Yan Luo

PII: S0167-739X(17)30769-0

DOI: <http://dx.doi.org/10.1016/j.future.2017.04.038>

Reference: FUTURE 3440

To appear in: *Future Generation Computer Systems*

Received date: 18 September 2016

Revised date: 27 March 2017

Accepted date: 25 April 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights (for review)**

- The first x86 multicore system for measuring network at 100Gbps rate is proposed.
- We use DPDK to accelerate packet I/O throughput in user space.
- Multiple measurement designs based on DPDK RX modes and data structures are proposed.
- An optimal practical implementation for each different DPDK RX mode is proposed.
