This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Our approach combines resource monitoring with dynamic workflow orchestration.
- We take into account the status of the service and changes in system resources
- We provide extensible support for the expression of resource management strategies
- We provides extensible support for the expression of activation patterns
- We provide explicit support for power resource management
