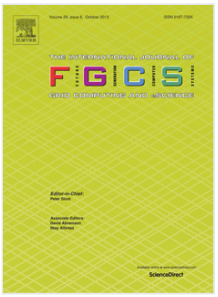
Accepted Manuscript



Assessing and forecasting energy efficiency on cloud computing platforms

Josep Subirats, Jordi Guitart

PII: S0167-739X(14)00242-8
DOI: http://dx.doi.org/10.1016/j.future.2014.11.008
Reference: FUTURE 2664

To appear in: *Future Generation Computer Systems*

Received date: 18 October 2013
Revised date: 10 November 2014
Accepted date: 10 November 2014

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

* Assess and forecast energy/ecological efficiency for multiple levels in real time.
* Assess and forecast energy/ecological efficiency for potential actions.
* Estimate the future CPU utilisation of a VM.
