Please cite this article in press as: T. Suzuki, Non-Depth-First Search against Independent Distributions on an AND-OR Tree, *Inf. Process. Lett.* (2018), https://doi.org/10.1016/j.ipl.2018.06.013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Investigate non-depth-first algorithms against independent distributions.
- An equilibrium point among independent distributions has optimal algorithm that is depth-first.
- Give positive answers to the questions in Suzuki-Niida (2015).
- Extend theorem 3 of Peng et al. (2017) to the non-depth-first case.
