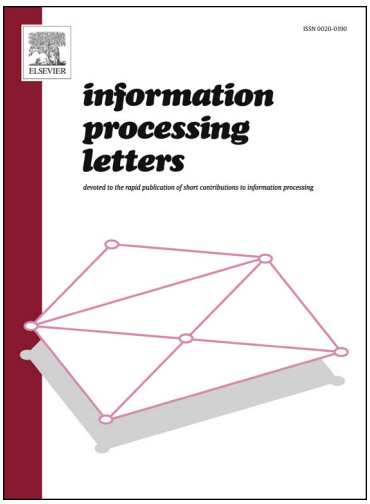
Accepted Manuscript



The imprecisions of precision measures in process mining

Niek Tax, Xixi Lu, Natalia Sidorova, Dirk Fahland, Wil M.P. van der Aalst

PII: S0020-0190(18)30028-0
DOI: https://doi.org/10.1016/j.ipl.2018.01.013
Reference: IPL 5635

To appear in: *Information Processing Letters*

Received date: 3 May 2017
Accepted date: 31 January 2018

Please cite this article in press as: N. Tax et al., The imprecisions of precision measures in process mining, *Inf. Process. Lett.* (2018), https://doi.org/10.1016/j.ipl.2018.01.013

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A set of axioms for precision measures in process mining is postulated.
- Existing precision measures are validated on the postulated set of axioms.
- None of the existing precision measures consistently quantify precision.
