Title: A Novell Approach on Evolutionary Dynamics Analysis
– A Progress Report

Author: Ivan Zelinka Lukas Tomaszek Pandian Vasant Tran
Trong Dao Duy Vo Hoang

PII: S1877-7503(17)30112-6
DOI: <http://dx.doi.org/doi:10.1016/j.jocs.2017.08.010>
Reference: JOCS 743

To appear in:

Please cite this article as: Ivan Zelinka, Lukas Tomaszek, Pandian Vasant, Tran Trong Dao, Duy Vo Hoang, A Novell Approach on Evolutionary Dynamics Analysis ndash A Progress Report, <![CDATA[*Journal of Computational Science*]]> (2017), <http://dx.doi.org/10.1016/j.jocs.2017.08.010>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights:

- Evolution algorithm dynamics can be captured into a complex network.
- Complex networks properties or edges can be converted into a CML.
- Evolution algorithm dynamics changed after creating a feedback loop.
- The feedback loop allows us to control the algorithm dynamics.
