Title: Maximizing the completion rate of concurrent scientific applications under time and budget constraints

Author: Hamid Arabnejad Jorge G. Barbosa

PII: S1877-7503(16)30244-7
DOI: <http://dx.doi.org/doi:10.1016/j.jocs.2016.10.013>
Reference: JOCS 563

To appear in:

Received date: 1-12-2015
Revised date: 17-8-2016
Accepted date: 20-10-2016

Please cite this article as: Hamid Arabnejad, Jorge G. Barbosa, Maximizing the completion rate of concurrent scientific applications under time and budget constraints, *Journal of Computational Science* (2016), <http://dx.doi.org/10.1016/j.jocs.2016.10.013>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Hamid Arabnejad received the BSc degree in Software Engineering from Azad University, Mashhad Branch, Iran, in 2003, and the MSc in Software Engineering from Azad University, South Tehran Branch, Iran, in 2008. From 2007 to 2009 he served as a teacher in several computer science courses of Azad University and Applied-Scientific Comprehensive University. He finished his PhD studies in computer science at University of Porto, Portugal, in 2016. His research interests are in the fields of grid and distributed computing systems, especially global scheduling and data management in grid and cloud computing.

Jorge G. Barbosa received the BSc degree in Electrical and Computer Engineering from Faculty of Engineering of the University of Porto (FEUP), Portugal, the MSc in Digital Systems from University of Manchester Institute of Science and Technology, England, in 1993, and the PhD in Electrical and Computer Engineering from FEUP, Portugal, in 2001. Since 2001 he is an Assistant Professor at FEUP. His research interests are related to parallel and distributed computing, heterogeneous computing, scheduling in heterogeneous environments, cloud computing and biomedical engineering.
