Title: Interpolating Sparse Scattered Data Using Flow Information

Author: Gregory J. Streltz Geoffrey Gebbie Oliver Kreylos
Bernd Hamann Louise H. Kellogg Howard J. Spero

PII: S1877-7503(16)30039-4
DOI: <http://dx.doi.org/doi:10.1016/j.jocs.2016.04.001>
Reference: JOCS 481

To appear in:

Received date: 7-2-2014
Revised date: 25-2-2016
Accepted date: 2-4-2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Gregory J. Streletz is a graduate student in computer science at UC Davis. He has received a BS degree in physics and mathematics from Yale, an MS degree in applied mathematics from UMass Amherst, and an MS degree in computer science from UC Davis. He also holds masters degrees in engineering and project management, both from the University of Wisconsin Platteville. Prior to returning to UC Davis to pursue his Ph.D. studies, Greg worked as a scientific and mathematical software developer for over a decade, most of which was spent at Lawrence Livermore National Laboratory.
