This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- A light-weight log-based hybrid storage system is proposed.
- The existing file systems are not suitable for different types of storage.
- We design a hybrid file system for hybrid storage devices.
- The proposed file system effectively improves the performance of the storage system.
