Accepted date: 26 February 2018

Please cite this article as: J. Eckroth, A course on big data analytics, *J. Parallel Distrib. Comput.* (2018), <https://doi.org/10.1016/j.jpdc.2018.02.019>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights for submission J. Eckroth, "A Course on Big Data Analytics"

- A course designed for undergraduate junior and senior computer science students.
- Curriculum is project-oriented and focuses on modern tools such as Hadoop and Spark.
- Course projects are explained in detail.
- On-premise and cloud computing infrastructure are evaluated and cost-compared.
