To appear in: *J. Parallel Distrib. Comput.*

Received date: 14 June 2017
Revised date: 19 January 2018
Accepted date: 26 February 2018

Please cite this article as: N. Giacaman, O. Sinnen, Preparing the software engineer for a modern multi-core world, *J. Parallel Distrib. Comput.* (2018), <https://doi.org/10.1016/j.jpdc.2018.02.028>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Proposal of a Modern Parallel Parallel Programming Framework incorporating PDC concepts with mainstream application domains.
- Applying PDC programming in the context of Graphical User Interfaces and Object-Oriented Programming.
- Proposal of Active Classroom Programmer (ACP) to present parallel programming for desktop and mobile applications, encouraging active learning.
- Proposal of Research-infused and Problem based learning environments for PDC.
