

Accepted Manuscript

Energy optimization of security-sensitive mixed-criticality applications
for distributed real-time systems

Jinyu Zhan, Xia Zhang, Wei Jiang, Yue Ma, Ke Jiang

PII: S0743-7315(18)30091-1
DOI: <https://doi.org/10.1016/j.jpdc.2018.02.014>
Reference: YJPDC 3831

To appear in: *J. Parallel Distrib. Comput.*

Received date: 2 June 2015
Revised date: 29 September 2017
Accepted date: 20 February 2018

Please cite this article as: J. Zhan, X. Zhang, W. Jiang, Y. Ma, K. Jiang, Energy optimization of security-sensitive mixed-criticality applications for distributed real-time systems, *J. Parallel Distrib. Comput.* (2018), <https://doi.org/10.1016/j.jpdc.2018.02.014>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Establishing the system model to capture security-critical applications in mixed-criticality systems.

Proposing a system-level design framework for energy optimization of security-sensitive mixed-criticality systems.

Presenting a GA based efficient heuristic algorithm to address the system-level optimization problem.
