

Accepted Manuscript

Lightweight Energy Consumption Analysis and Prediction for Android Applications

Yan Hu, Jiwei Yan, Dong Yan, Qiong Lu, Jun Yan

PII: S0167-6423(17)30095-3
DOI: <http://dx.doi.org/10.1016/j.scico.2017.05.002>
Reference: SCICO 2095

To appear in: *Science of Computer Programming*

Received date: 6 January 2017
Revised date: 29 April 2017
Accepted date: 10 May 2017

Please cite this article in press as: Y. Hu et al., Lightweight Energy Consumption Analysis and Prediction for Android Applications, *Sci. Comput. Program.* (2017), <http://dx.doi.org/10.1016/j.scico.2017.05.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An automatic approach to construct accurate energy model for Android app is proposed;
- An optimized linear regression algorithm to induce energy model.
- API level energy prediction is studied, modeling energy consumption of Android APIs.
