

Accepted Manuscript

Zone-based formal specification and timing analysis of real-time self-adaptive systems

Matteo Camilli, Angelo Gargantini, Patrizia Scandurra

PII: S0167-6423(18)30075-3
DOI: <https://doi.org/10.1016/j.scico.2018.03.002>
Reference: SCICO 2196

To appear in: *Science of Computer Programming*

Received date: 16 January 2017
Revised date: 22 December 2017
Accepted date: 5 March 2018

Please cite this article in press as: M. Camilli et al., Zone-based formal specification and timing analysis of real-time self-adaptive systems, *Sci. Comput. Program.* (2018), <https://doi.org/10.1016/j.scico.2018.03.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Formal model for self-adaptive behavior of real-time systems.
- Modular and incremental modeling and verification process.
- Mapping of the model into state space regions identifying adaptation behavior.
- Adaptation requirements model checking, including temporal properties
