An ontology-based approach with which to assign human resources to Software projects

Mario Andrés Paredes-Valverde, María del Pilar Salas-Zárate, Ricardo Colomo-Palacios,
Juan Miguel Gómez-Berbís, Rafael Valencia-García

PII: S0167-6423(18)30004-2
DOI: <https://doi.org/10.1016/j.scico.2018.01.003>
Reference: SCICO 2184

To appear in: *Science of Computer Programming*

Received date: 15 December 2016
Revised date: 20 October 2017
Accepted date: 10 January 2018

Please cite this article in press as: M.A. Paredes-Valverde et al., An ontology-based approach with which to assign human resources to Software projects, *Sci. Comput. Program.* (2018), <https://doi.org/10.1016/j.scico.2018.01.003>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We present an ontology-based system to personnel assignment to software projects.
- We propose an ontology to describe personnel competences.
- We present an ontology to describe the software development technologies domain.
- We have conducted an evaluation in a software development organization.
