

# Accepted Manuscript

Formal model-driven engineering of critical information systems

Jim Davies, David Milward, Chen-Wei Wang, James Welch

PII: S0167-6423(14)00536-X  
DOI: [10.1016/j.scico.2014.11.004](https://doi.org/10.1016/j.scico.2014.11.004)  
Reference: SCICO 1842

To appear in: *Science of Computer Programming*

Received date: 17 June 2013  
Revised date: 11 November 2014  
Accepted date: 12 November 2014

Please cite this article in press as: J. Davies et al., Formal model-driven engineering of critical information systems, *Sci. Comput. Program.* (2015), <http://dx.doi.org/10.1016/j.scico.2014.11.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## **Highlights**

- Model-driven tools can reduce the cost of development and verification.
- Information systems can be produced automatically from object oriented designs.
- A formal, model-driven approach is proposed for use in safety critical systems.
- A framework is provided for the correctness of model transformations.
