

Accepted Manuscript

Reconstructing a string from its Lyndon arrays

Frantisek Franek, Jacqueline W. Daykin, Jan Holub, A.S.M. Sohidull Islam, W.F. Smyth

PII: S0304-3975(17)30330-4
DOI: <http://dx.doi.org/10.1016/j.tcs.2017.04.008>
Reference: TCS 11161

To appear in: *Theoretical Computer Science*

Received date: 13 June 2016
Revised date: 9 April 2017
Accepted date: 17 April 2017

Please cite this article in press as: F. Franek et al., Reconstructing a string from its Lyndon arrays, *Theoret. Comput. Sci.* (2017), <http://dx.doi.org/10.1016/j.tcs.2017.04.008>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An algorithm to determine whether or not a given array is a Lyndon array.
- Two algorithms to compute a string from a valid Lyndon array.
- An algorithm to compute a unique string from “rotated” Lyndon arrays.
- Plus theoretical background.
