Disjointed force polyhedra

Juney Lee, Tom Van Mele, Philippe Block

PII: S0010-4485(18)30065-4
DOI: <https://doi.org/10.1016/j.cad.2018.02.004>
Reference: JCAD 2581

To appear in: *Computer-Aided Design*

Received date : 3 November 2017

Accepted date : 10 February 2018

Please cite this article as: Lee J., Mele T.V., Block P. Disjointed force polyhedra. *Computer-Aided Design* (2018), <https://doi.org/10.1016/j.cad.2018.02.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Disjointed force polyhedra

Corresponding Author: Juney Lee, M.Eng & M.Arch

Second authors: Tom Van Mele, Ph.D; Philippe Block, Ph.D

Affiliation of the authors: ETH Zurich

Highlights

- A new computational framework for 3D graphic statics using disjointed force polyhedra
- Iterative geometric algorithms for construction of force polyhedra with target face normals and areas
- Flexible datastructure for a network of disjointed force polyhedra in equilibrium
- Construction of disjointed polyhedral force diagrams for new structural typologies
- Interactive force-driven design explorations with disjointed force polyhedra
