This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- Efficient convex optimization of tileable shapes with prescribed reflectance
- Design of light efficient cinema screens reflecting light only towards the audience
- Up to 3 times brighter screens than high gain cinema silver screens
- Arbitrary audience shape with support for split-audience reflections
