Vertically aligned double wall carbon nanotube arrays adsorbent for pure and mixture adsorption of H₂S, ethylbenzene and carbon monoxide, grand canonical Monte Carlo simulation

Saeideh Tasharrofi, Hossein Taghdisian, Abdollah Golchoobi

PII: S1093-3263(17)30810-0

DOI: [10.1016/j.jmgm.2018.02.015](https://doi.org/10.1016/j.jmgm.2018.02.015)

Reference: JMG 7134

To appear in: *Journal of Molecular Graphics and Modelling*

Received Date: 25 October 2017

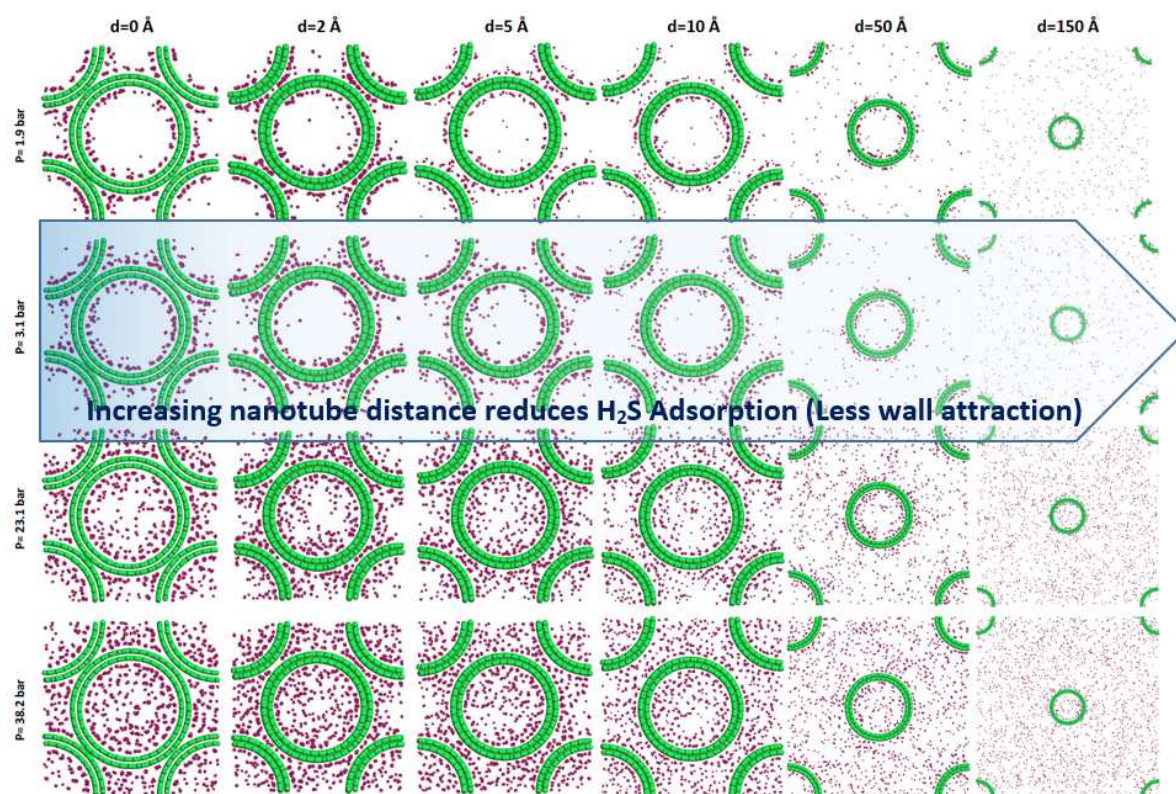

Revised Date: 25 January 2018

Accepted Date: 18 February 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
