A Computational Method for Longitudinal Mapping of
Orientation-specific Expansion of Cortical Surface in Infants

Jing Xia , Fan Wang , Yu Meng , Zhengwang Wu , Li Wang ,

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose a novel method for mapping orientation-specific cortical expansion
- We derive folding orientation fields by fusing sulcal depth and curvature information
- We chart the first longitudinal map of orientation-specific infant cortical expansion
