A Deep Learning Approach for Real Time Prostate Segmentation in Freehand Ultrasound Guided Biopsy

Emran Mohammad Abu Anas, Parvin Mousavi, Purang Abolmaesumi

PII: S1361-8415(18)30349-9
DOI: [10.1016/j.media.2018.05.010](https://doi.org/10.1016/j.media.2018.05.010)
Reference: MEDIMA 1377

To appear in: *Medical Image Analysis*

Received date: 19 February 2018
Revised date: 30 May 2018
Accepted date: 31 May 2018

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Real-time prostate segmentation to enable a targeted prostate biopsy system
- Convolutional neural networks for extracting spatial features and recurrent neural networks for temporal features
- Improved architecture and training of the network to provide better segmentation
