Accepted Manuscript

Full Left Ventricle Quantification via Deep Multitask Relationships Learning

Wufeng Xue, Gary Brahm, Sachin Pandey, Stephanie Leung, Shuo Li

PII: S1361-8415(17)30136-6
DOI: 10.1016/j.media.2017.09.005
Reference: MEDIMA 1298

To appear in: *Medical Image Analysis*

Received date: 23 June 2017
Revised date: 25 August 2017
Accepted date: 18 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

ACCEPTED MANUSCRIPT

Highlights

- An effective end-to-end integrated framework for full quantification of cardiac LV.
- A brand-new multitask relationship learning method for deep neural networks.
- Proof of the convexity and proposing of an efficient algorithm for the framework.
