This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- DICCCOL provides consistent and corresponding reference across subjects and populations;
- Group-wise EM finds consistent corresponding parcels and preserves a certain level of individual variance;
- Use of a spectrum of parcellations is flexible;
- Structural parcellation boundaries segregate functionally homogeneous areas.
