This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlight

- Providing a summary of the current challenges related to the formal verification approaches in the cloud computing.
- Presenting a Systematic Literature Review (SLR) method for the formal verification approaches in the cloud computing topics and additional significant achievement in this area.
- Exploring a structure of the important methods that are significant in formal verification approaches.
- Discussing the important factors of formal verification approaches in the cloud environment to improve their problems in the future.
