Cybersecurity and Privacy in Standards for Smart Grids – a Comprehensive Survey

Rafał Leszczyna

PII: S0920-5489(17)30127-7
DOI: [10.1016/j.csi.2017.09.005](https://doi.org/10.1016/j.csi.2017.09.005)
Reference: CSI 3238

To appear in: *Computer Standards & Interfaces*

Received date: 10 April 2017
Revised date: 30 July 2017
Accepted date: 11 September 2017

Please cite this article as: Rafał Leszczyna, Cybersecurity and Privacy in Standards for Smart Grids – a Comprehensive Survey, *Computer Standards & Interfaces* (2017), doi: [10.1016/j.csi.2017.09.005](https://doi.org/10.1016/j.csi.2017.09.005)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Completely new (2017), updated survey of smart grid standards related to security and privacy
- The most recent versions of standards analysed
- High assurance of completeness due to the application of a repeatable and systematic literature search and analysis method
- The details of the research method provided
- Explicitly defined standards' selection and evaluation criteria
- 36 standards described from cyber security perspective
- 12 standards that address privacy issues recognised
- All the standards referenced to the IEC smart grid architecture
