Analyzing the Role of Interfaces in Enterprise Service Bus: A
Middleware Epitome for Service-Oriented Systems

Robin Singh Bhadoria , Narendra S. Chaudhari ,
Tharinda Nishantha Vidanagama

PII: S0920-5489(17)30052-1
DOI: [10.1016/j.csi.2017.08.001](https://doi.org/10.1016/j.csi.2017.08.001)
Reference: CSI 3228

To appear in: *Computer Standards & Interfaces*

Received date: 9 February 2017
Revised date: 13 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Investigate on software based interface through well-defined connectors available in Enterprise Service Bus (ESB).
- Discusses core design principle for ESB based Interface in facilitating middleware solution
- Comparison between non-ESB and ESB as interface usage in facilitating services over network/cloud.
- A mathematical formulation to driven the relationship between multiple services.
