This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A Survey of Android Exploits in the Wild

Huasong Meng, Vrizzlynn L. L. Thing, Yao Cheng, Zhongmin Dai, and Li Zhang

Biographical Sketch

Huasong Meng

Huasong Meng received his Master of Computing degree in Infocomm Security at National University of Singapore in 2016 and B.Eng. (Hon.) degree in Computer Science at Nanyang Technological University in 2014. He is currently serving as a research engineer at Institute for Infocomm Research, A*STAR, Singapore. His working experience covers mobile security implementation for government, banking and financial industry. His research areas include mobile system security, vulnerability analysis and blockchain.

Vrizzlynn L. L. Thing

Dr. Vrizzlynn Thing leads the Cyber Security Cluster, which comprises the Data Security Department, the Network Security Department, and the Systems Security Department at the Institute for Infocomm Research (I2R), Agency for Science, Technology and Research (A*STAR). She is also an Adjunct Associate Professor at the National University of Singapore (School of Computing), and holds the appointment of Honorary Assistant Superintendent of Police (Specialist V) at the Singapore Police Force, Ministry of Home Affairs. Her research draws on her multidisciplinary background in computer science (Ph.D. from Imperial College London, United Kingdom), and electrical, electronics, computer and communications engineering (M.Eng. by Research and B.Eng (Hons) from Nanyang Technological University, Singapore, and Diploma from Singapore Polytechnic). During her career, she has taken on various roles with the key focus to lead and conduct cyber security R&D that brings a positive impact to our economy and society. She also participates actively as the Lead Scientist of collaborative projects with industry partners and government agencies, and is the Co-Director of the ST-InfoSec - A*STAR Cyber Security Joint Lab, the Sopra Steria - A*STAR Cyber Security Joint Lab, and the Custodio - A*STAR Cyber Security Joint Lab.

Yao Cheng
