Time between vulnerability disclosures: A measure of software product vulnerability

Pontus Johnson[a], Dan Gorton[b], Robert Lagerström[a], Mathias Ekstedt[a]

[a]*KTH Royal Institute of Technology, Stockholm, Sweden*

[b]*foreseeti, Stockholm, Sweden*

Email address: pontusj@kth.se (Pontus Johnson)

Pontus Johnson is professor of industrial information systems at the Royal Institute of Technology (KTH) in Stockholm. His research is focused on the analysis of large-scale enterprise-wide information systems. He has authored some 100 scientific articles, mainly on the prediction of non-functional properties of large-scale system architectures. In recent years, cyber security has become a main topic of interest. He is a member of IVA (Royal Swedish Academy of Engineering Sciences).

Dan Gorton, Licentiate of Engineering
Dan Gorton is a cybersecurity research manager at the proactive security company Foreseeti, in Stockholm, Sweden. He received his MSc in computer science in 1997 at KTH Royal Institute of Technology, in Stockholm, Sweden, and a Licentiate of Engineering in 2003 at Chalmers, University of Technology, in Gothenburg, Sweden. His current research focuses on proactive modeling of security risks using attack and defense trees. Dan has 19 years of industry experience, working with different security and risk issues primarily within the banking, defense, and telecom sectors.

Robert Lagerström is associate professor in information systems architecture at KTH Royal Institute of Technology. He is also a visiting scholar at Harvard Business School. Robert received is master in computer science and his PhD in electrical engineering both at KTH, in 2006 and 2010 respectively. During 2010-11 he was an industrial post-doc at ABB Corporate Research and he spent 2013 as a research associate at Harvard. His main research interests are complex software systems, architecture modeling, and cyber security.
