This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- We propose adding meta-object protocols (MOPs) to meta-modelling environments
- An open design for a meta-modelling environment improves flexibility and extensibility
- We implement MOPs for MetaDepth and atop the Eclipse Modelling Framework (EMF)
- MOPs enable modelling services not foreseen when MetaDepth and EMF were created
