Software Engineering Process Models For Mobile App Development:
A Systematic Literature Review

Ronald Jabangwe, Henry Edison, Anh Nguyen Duc

PII: S0164-1212(18)30163-8
DOI: <https://doi.org/10.1016/j.jss.2018.08.028>
Reference: JSS 10207

To appear in: *The Journal of Systems & Software*

Received date: 1 May 2018
Revised date: 24 July 2018
Accepted date: 7 August 2018

Please cite this article as: Ronald Jabangwe, Henry Edison, Anh Nguyen Duc, Software Engineering Process Models For Mobile App Development: A Systematic Literature Review, *The Journal of Systems & Software* (2018), doi: <https://doi.org/10.1016/j.jss.2018.08.028>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- A comprehensive list of twenty process models for developing mobile apps;
- Usefulness to industry of the models based on rigor/relevance framework assessment;
- A synthesis of the models based on their Software Engineering areas and focus.
