This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights

- U-RUCM, a use case modeling framework particularly designed for modeling uncertainties.
- U-RUCM tool can be used for specifying use case models with uncertainties.
- U-RUCM was developed in the context of an EU project
- U-RUCM has been evaluated with two industrial case studies.
